Timeline of US-Originated Tensions | Dec 2025 – Mar 2026

BBLAM

DATE	EVENT	KEY DETAILS
28 Dec 2025	Iran Protests Erupt	Mass protests begin at Tehran's Grand Bazaar after rial collapses past 1.4M/USD; inflation >40%. Protests spread nationally — calls for regime change intensify.
Late Dec 2025	US Naval Buildup	US launches largest military buildup in the southern Caribbean in decades. Naval task force deployed near Venezuela begins intercepting boats alleged to traffic narcotics.
2 Jan 2026	Trump warns Iran	Trump posts on Truth Social: Iran is 'locked and loaded' warning — 'if Iran violently kills peaceful protesters, the US will come to their rescue.' Threatens military intervention.
3 Jan 2026	Operation Absolute Resolve — Venezuela	US special forces strike Venezuelan military bases and extract President Nicolás Maduro from a Caracas safe house. Maduro faces narco-terrorism charges from 2020 US DOJ indictment. VP Delcy Rodríguez installed as interim leader.
5–8 Jan 2026	Greenland Escalation	Trump revives annexation push: 'We need Greenland — we need it for defense.' Denmark deploys military to Greenland; Danish PM warns 'a US invasion would mean the end of NATO.' NATO allies deploy to Arctic.
8–9 Jan 2026	Iran Crackdown / US Threats	Iran government crackdown on protests — human rights groups estimate 2,500–12,000 killed in two nights. Trump: 'help is on the way.' G7 foreign ministers warn of 'additional restrictive measures.'
13 Jan 2026	Iran Tariff Threat	Trump announces 25% secondary tariff on all countries that do business with Iran. Sanctions executive order signed Feb 9. Primarily impacts Iraq and Iran; China / UAE / Turkey seen as better able to pivot.
19 Feb 2026	US–Indonesia Trade Deal	US & Indonesia finalize deal at 19% reciprocal tariff (down from threatened 32%) — signals selective US trade engagement amid broader geopolitical posture.
28 Feb 2026	Operation Epic Fury — Iran	Joint US-Israeli airstrikes on Iranian leadership and military infrastructure. Supreme Leader Khamenei killed. Iran retaliates by disrupting Strait of Hormuz traffic. Brent crude surges 15% overnight.
1–4 Mar 2026	Global Market Shock	Oil reaches $119 WTI before settling ~$100. KOSPI drops 12% in one day (circuit breaker triggered). Thai SET drops 8%. Strait of Hormuz effectively impaired. Flights grounded from Dubai. Gold surges.
Mar 2026 (ongoing)	Stagflation Risk Rises	Brent up ~50% YTD. Fed holds rates; Yellen warns tariffs push inflation to ≥3%. ECB in 'genuine dilemma.' Goldman Sachs: gasoline could reach $3.50/gal in US if Hormuz stays shut >weeks.

FROM OBSERVATIONS TO PORTFOLIO ACTION | The Full Logical Framework

BBLAM

STEP 1 — WHAT HAPPENED?

US-Originated Geopolitical Shocks (Dec 2025 – Mar 2026)

- VE Venezuela Invasion (Jan 3)
- Greenland Annexation Push (Jan 5–8)
- IR Iran Strikes + Hormuz (Feb 28)

STEP 2 — HOW DO WE READ THE SITUATION?

① TOP-DOWN ANALYSIS

Macro Data	→ GDP, CPI, trade deficit, rates — lagged; doesn't fully reflect tension yet
Geopolitical Risk	→ Depends on ONE person (US President) — scenario-based, not modelable
Market Expectations	→ What is market pricing? What does market fear?

② BOTTOM-UP ANALYSIS

Sectors / Companies	→ Pricing power? Cost pass-through? Inventory buffers? Policy tailwinds?
Country Selection	→ Currency stable? Current acct surplus? FX reserves adequate? Own resources?
Hidden Gems	→ Undervalued by macro noise — fundamentally strong amid disruption

STEP 3 — HOW DO WE GET TO RESULTS?

③ SHORT-TERM | ใจกลางความขัดแย้ง

Sectors / Companies	→ Pricing power · Pass-through ability · Large inventory buffers · Policy tailwinds
Countries	→ Currency stability · Current account surplus · Sound FX reserves · Own resources

Baskets: B-Basic · B-Short Term Plus · B-China

BARBELL

④ LONG-TERM | After the Storm Clears

Inflation Lingers	→ War consumes capital → supply chain disruption → structural inflation floor rises
Rates Stay Higher	→ Fed on hold · New governor (May 2026) inherits the stagflation complexity

Baskets: B-CNnext · B-USAlpha · B-Innotech · B-Gold

Top-Down Analysis | Macroeconomic Data — Not Yet Fully Reflecting Tension

BBLAM

US GDP Growth

2.1%

2025 actual — tariff drag not yet fully in data

US Inflation (CPI)

2.4%

Feb 2026; above Fed 2% target; tariff risk adds pressure on inflation

Brent Crude YTD

+50%

Post-Iran strikes (Mar 2026); structural supply shock

US PMI Composite

51.4

Manufacturing 52.4
Service 51.1

Fed Funds Rate

3.5-3.75% On Hold

Iran conflict + inflation = rates not moving soon

WTI Oil (Peak)

$119

Hormuz disruption; settled ~$100; $150 tail-risk remains

⚠ *Key insight: Lagged data means official macro figures do not yet capture the full Iran war shock. Forward-looking market signals are more informative than backward-looking statistics.*

Sources: BEA, Fed, IMF, WEF Global Trade Update (Feb 2026)

BBLAM

THE CHALLENGE

- Risk originates from a single decision-maker — the US President
- Actions are unpredictable, non-linear, and not bound by historical precedent
- Venezuela → Greenland → Iran escalation happened in under 90 days
- Markets cannot price a one-person variable with standard models
- Traditional geopolitical risk frameworks assume institutional constraints — these are now weakened

SCENARIO FRAMEWORK

Escalation **Prob: 35%***

Hormuz stays shut >4 weeks; oil >$130; hard landing risk

Negotiation **Prob: 40%***

Iran ceasefire within 6–8 weeks; oil normalizes to $85–90

Expansion **Prob: 15%***

Conflict spreads to GCC bases; systemic shock; gold >$3,500

Status Quo **Prob: 10%***

Tactical pause, no resolution; elevated uncertainty persists

Note: * For illustrative purpose only

BBLAM

WHAT THE MARKET IS PRICING

Oil Supply Shock

Brent +50% YTD; Hormuz risk premium embedded

Higher-for-Longer Rates

Fed on hold; Iran war + tariff = persistent inflation

Defense & Energy Premium

Aerospace/Defense + Energy outperforming sharply

USD Safe-Haven Demand

DXY elevated; risk-off flows into USD & Treasuries

Gold as Hedge

Gold surging; disruptions to Dubai gold flows reported

WHAT THE MARKET FEARS

Hormuz Closure >4 Weeks

Oil >$150; global stagflation scenario materializes

GCC (Gulf Cooperation Council) Retaliation Spreads

Saudi/UAE bases targeted → oil infrastructure hits

Fed Forced Rate Hike

If inflation accelerates above 4%; growth collapses

China Opportunism

Taiwan action if US overextended; tech supply disruption

US Recession

Consumer spending squeeze from energy + tariff double shock

Sources: Goldman Sachs, Nomura, Bank of America, CNBC (Mar 2026)

Bottom-Up Analysis | Finding Hidden Gems in the Noise

BBLAM

Energy & Resources

- Integrated oil majors (pricing power intact)
- LNG exporters (Hormuz avoidance premium)
- Critical minerals / rare earths
- Coal & nuclear as backup baseload

Defense & Aerospace

- NATO ramp-up beneficiaries (EU defense spend)
- US prime contractors (policy tailwind)
- Satellite & surveillance tech
- Cybersecurity — state-sponsored threat surge

Financials & Hard Assets

- Gold miners (leverage to gold >$3,000)
- Infrastructure — supply chain relocation plays
- Private credit (higher-for-longer beneficiary)
- Insurance — geopolitical risk repricing

COUNTRY-LEVEL OPPORTUNITY — Resilient Fundamentals

SG Singapore · Current acct surplus, strong FX, trade hub

ID Indonesia · 19% tariff deal done; own resources; young population

SA Saudi Arabia · Oil windfall; Vision 2030; FX reserves $460Bn+

CN China · Strong government; own resources; BRICS alliance; stable CNY

SHORT-TERM VIEW | ใจกลางความขัดแย้ง — Eye of the Storm

BBLAM

SECTOR / COMPANY LENS

Pricing Power

Companies that can raise prices without losing volume — essential goods, tolls, energy utilities

Cost Pass-Through

Businesses with inflation-linked contracts — REITs, regulated utilities, infrastructure

Large Old Stocks

Deep inventory buffers that can weather supply disruption without margin collapse

Policy Tailwind

Defense contractors, domestic energy producers, strategic mineral processors — directly supported by current US policy

COUNTRY SELECTION LENS

Currency Stability

Countries with managed or pegged FX, low inflation pass-through, and deep central bank reserves

Current Account Surplus

Self-financing economies: Singapore, Norway, Saudi Arabia, Indonesia, UAE

FX Reserve Adequacy

≥6 months import cover; capable of defending currency during risk-off

Own Resources

Net commodity exporters shielded from oil price shock — and even benefiting from it

Long-Term View | After the Storm — What's Left Standing?

BBLAM

Wars consume capital. The conflict will eventually resolve — but the economic backdrop it leaves behind matters for long-term positioning.

Lingering Inflation

Supply chains disrupted. Energy costs structurally higher. Commodity prices reset upward. Expect 2–3% inflation to become the floor, not the ceiling, even post-conflict.

→ Bonds face headwinds; real assets win

Rates Not Declining Soon

Yellen warns tariffs push inflation ≥3%. Iran war keeps Fed on hold. New Fed Governor (May 2026) inherits a complex mandate — expect caution over cuts for 12–18 months.

→ Private credit > IG bonds; dividend yield attractive

Tech Still Attractive

Geopolitical tension accelerates defense tech, AI for intelligence, semiconductor sovereignty push. Long-term demand for innovation does not diminish — it shifts toward national security use cases.

→ Selective tech: defense-AI, semiconductors, cybersec

Gold Structural Bid

Central bank gold buying accelerated since 2022. Sanctions weaponization of USD drives EM reserve diversification. Gold is a hedge against both geopolitical risk AND fiat debasement.

→ Gold as core long-term portfolio anchor (5–10%)

BBLAM

สั้น — Defensive Income + Tactical Thai + Liquidity Buffer | ข้อมูล ณ ต้นปี 2569 / Early 2026

BBASIC

บัวหลวงปัจจัย 4 *Thai Equity — Defensive Sector*

1Y Return	YTD
-4.25%	+2.69%

Style: Active — Value / Quality

กองแม่: Direct — Thai equities (Necessities sectors)

นโยบาย:

Invests ≥80% NAV in Thai equities of companies in 4 essential sectors: Food, Housing, Clothing, Medicine

→ Defensive staples focus — low sensitivity to geopolitical shock; pricing power embedded

BTK

บัวหลวงหุ้นไทย *Thai Equity — Broad Market*

1Y Return	YTD
+23.96%	+9.11%

Style: Active — Growth / Thai Market

กองแม่: Direct — Thai large-cap growth equities (SET)

นโยบาย:

Invests in Thai listed equities; benchmark-beating Active management vs. SET TRI index

→ Tactical Thai market exposure — benefits from domestic policy stimulus and SET recovery play

B-ST

บัวหลวงตราสารหนี้ระยะสั้น *Fixed Income — Short Duration*

1Y Return	YTD
+1.36%	+0.2%

Style: Passive/Conservative — Short Duration

กองแม่: Direct — Thai government & high-grade corporate short-term bonds

นโยบาย:

Short-term Thai govt/corporate bonds; high liquidity; suitable as cash parking / capital preservation

→ Capital preservation anchor; rates on hold = stable yield; liquidity buffer in volatile environment

Portfolio Mix Suggestion

BBASIC 40%	Core defensive — necessities, stable cash flow	
BTK 35%	Thai market recovery play — domestic policy upside	
B-ST 25%	Liquidity anchor — capital preservation, rates on hold

NEXT CATALYSTS TO WATCH | Dates That Set the Tone

April 2026 | IMF World Economic Outlook

New WEO GDP Projections

The IMF's April 2026 WEO will be the first official global GDP baseline incorporating the Iran war shock, Hormuz disruption, and escalating tariff regime. Key to watch: IMF growth downgrades for Middle East, energy importers (India, Europe), and global trade volume revisions. Will set the narrative for Q2 GDP expectations and EM fund flows.

May 2026 | New Fed Governor Appointment

Interest Rate & DXY Tone

A new Fed Chair takes over from Powell — the appointment's political independence signal will be critical. Markets will price: (1) hawkish appointment = USD strength, rate expectations up, EM outflows; (2) dovish appointment = USD weakens, rate cut path re-opens, EM inflow opportunity. The new governor will also set the tone for how Fed communicates the inflation-growth tradeoff under tariff + energy shock simultaneously.

ACTION: Review all baskets post-WEO (April) and recalibrate after Fed Governor confirmation (May). These two events are the clearest triggers for portfolio rebalancing.
